

SOLUTIONS FOR FASTER, SMARTER TRADE FINANCE

Now in **production**, Contour enhances your digital trade journey by simplifying complex trade finance processes and improving working capital.

HOW DOES IT WORK?

COLLABORATE ON ONE PLATFORM

Contour connects you to all your banks and trade partners on a single, decentralised network.

This streamlined solution enables real-time data synchronisation, smart contracts and workflows, providing full data confidentiality and control.

GO PAPERLESS

Contour digitises the trade finance process by removing the need for paper.

Digital transaction evidence can be securely shared on our blockchain network either directly or through APIs from third-party digital document providers, such as electronic bills of lading.

DIGITISED LETTERS OF CREDIT

UNLOCKING **OPPORTUNITIES** WITH STREAMLINED, DIGITISED WORKFLOWS

Contour transforms the Letter of Credit process by managing the entire end-to-end process in a collaborative workflow. Buyers and sellers instant access and real-time visibility of the transaction, all on one connected platform.

“

“Collaborating with digital trade networks like Contour, allows Rio Tinto to eliminate the risks associated with physical documents and enhance the efficiency, security and experience for our customers. This is part of our longer-term objective of driving industry adoption, creating value and achieving a full digital future for trade.”

Michel Alves | **Rio Tinto**

ONE NETWORK FOR ALL YOUR TRADE FINANCE NEEDS

Contour is building a common network on one decentralised platform to enable the digital transformation of trade finance. Our open and inclusive network is interoperable across the industry, connecting businesses, financiers and partners seamlessly across the financial and physical supply chains.
